## Commonwealth Surgical Services announces Peripheral Artery Disease (PAD) Screening

Poor circulation in the legs, **Peripheral Artery Disease**, **PAD**, over 8 million people have it!

**PAD** causes pain, fatigue, tightness, or aching in the legs.

**PAD** causes ulceration, gangrene, and amputation

**PAD** puts you at a 6 times greater risk for heart attack or stroke

You should be tested for **PAD** if:

You are over 70

You have had a heart attack or stroke

You are over 50 and

- Have high blood pressure
- Have high cholesterol
- Have diabetes
- Smoke or used to smoke
- Have a family history of heart attack or stroke

To arrange for testing in the ICAVL accredited Lewistown Hospital Vascular Lab or for Peripheral Vascular Evaluation call your physician or:
